

HR/HT-0008 Country of origin: Probably France

DATA SUMMARY

Organisation:
Design/Manufacturer:
Year of Introduction: Believed mid/late 1950s.
Purpose: Agents
Receiver:
Circuit features: Considering the reaction control on the front panel most likely a TRF circuit. AM R/T and CW.
Frequency coverage: 3-15MHz in two ranges.
Transmitter:
Circuit features: Crystal oscillator/variable oscillator and RF PA. CW only.
Frequency coverage: 3-15MHz in two ranges.
Size (cm): Height 8, Length 14, Width 9. (estimated, both units were the same in size).
Power supply: Not known.

REMARKS

The HR-0008 receiver and HT-0008 transmitter were believed to be developed and constructed for the French agents. Apart from the two rare photos, no further information was found.
