Radio Communication Equipment
in the Army

WIRELESS *for the* WARRIOR

By Louis Meulstee and Chris Bisailion

The Pamphlet Series

No. 5 Key and Plug Assemblies Part 1

Primarily associated with the Key W.T. 8 Amp

About this pamphlet.

Key and Plug Assemblies were essential parts of most British (and Commonwealth) Army wireless sets and stations. This pamphlet shows the currently known types and versions of these Morse key assemblies, usually comprising a version of the Key W.T. 8 Amp, or variant produced abroad, spanning the period from the late 1930s until the 1950s when the Larkspur range of equipment started coming into service. It was compiled in close collaboration with Chris Bisailion, VE3CBK, Canada. Many of the keys in this Pamphlet are from Chris' collection.
